## Event Recap

**Circular Economy Event in July demonstrated the necessary rhythm of partnerships to grow together at PHCSE. Apasionado Dance began our event with a brief demonstration of choreography, performed by founders and dance instructors Matus and Irina. At this event, we learned how PHCSE families & Community can earn credits working in our Garden & Food Food Forest to later spend those credits at local businesses for food, entertainment, education and more. Please stay tuned as PHCSE sets the stage for academic and community transformation with more events and partnerships choreographed by Terroir Designs.**

## Updates from July:

# August Updates

Gardens are Growing. . .  
**And a Pumpkin has appeared!**  
**A groundhog has already taken a nibble and is building homes all around the school!**

## Sharing is Caring

Mr. Zuk & Ms. Williams shared a frame of PHCSE Bees with a Summer Camp at Garfield Community Farm. In addition to the Bees, PHCSE also donated some "Soil Sauce" from 2024 students' food recycling to help accelerate the compost and build the flavor of PHCSE into the soil at Garfield Community Farm!

**Our Flow Hive Queen saga continues...**

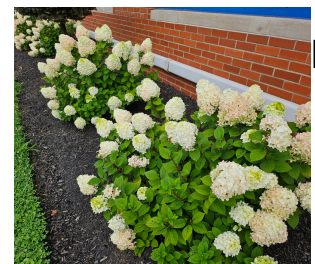

Click the link below to learn how Mr. Zuk is trying to help our Flow Hive Bees create a new Queen!

## Oh Deer,

The deer have continued munching on our plants around school. Flowers, Garden veggies, and Food Forest trees have all been on the deer menu in July.

Our experiment with Irish Spring Soap at our Gardens worked initially, but we needed to reapply after some heavy rain we got. How will Irish Spring Soap affect our soil ecosystem, I wonder?
